

Extent of Projected Tidal Flooding

Sea-Level Rise 1.7', 4.0', 6.3'

Coastal New Hampshire - North

Map 1N

Sea Level Rise Scenarios Applied to the Vulnerability Assessment
 Please note that these scenarios were selected prior to the release of the Science and Technical Advisory Panel Report to the N.H. Coastal Risks & Hazards Commission, in August, 2014. While slightly different than the scenarios cited in that report, they yield coverage estimates that are within the mapping margin of error.

Wake CP, Kirshen P, Huber M, Knutti K, and Stompono M (2011) Sea-Level Rise, Storm Surges, and Extreme Precipitation in Coastal New Hampshire: Analysis of Past and Projected Future Trends, prepared by the Science and Technical Advisory Panel for the New Hampshire Coastal Risks and Hazards Commission

	2000	2100
Current Elevation of MSL (ft)	0.0	0.0
100-Year Flood High	0.9	0.9
Storm Surge	0.0	0.0
Relative SLR	1.0	2.1
Total Inundation Elevation	1.2	1.7
