Appendix A:

Fiscal Constraint Documentation

For the 2025-2028 State Transportation Improvement Program and RPC 2025-2028 Transportation Improvement Program

The MPO Transportation Improvement Program and Long Range Transportation Plan are required to include a financial plan that demonstrates how the projects in the TIP and LRTP can be implemented given the anticipated revenues available to the region. The requirements of this process, the assumptions that are utilized, and the estimated revenues and project programming are included in this document.

To facilitate this aspect of TIP and LRTP development, the four New Hampshire MPOs worked to develop a common set of fiscal assumptions and tables. This coordination resulted in a list of common assumptions, funding distributions, and a standardized set of tables that show funding expected to be available to New Hampshire as well as the individual MPO regions.

FEDERAL REQUIREMENTS

For purposes of implementing the provisions of the federal transportation law (currently the Bipartisan Infrastructure Law [BIL]), the Federal Highway Administration (FHWA), and the Federal Transit Administration (FTA) jointly issued revised planning regulations governing the development of the Long Range Transportation Plans (the Plan) and Transportation Improvement Programs (TIP) for urbanized areas. These regulations are designed to ensure that metropolitan transportation planning and programming are adequate and that the areas are eligible for Federal highway and transit funds. One part of the planning regulations requires that the Plan include a financial plan "that demonstrates how the adopted transportation plan can be implemented" and provides supporting regulations in 23 CFR Part 450.324(g)(11):

- (i) For purposes of transportation system operations and maintenance, the financial plan shall contain system-level estimates of costs and revenue sources that are reasonably expected to be available to adequately operate and maintain Federal-aid highways (as defined by 23 U.S.C. 101(a)(5)) and public transportation (as defined by title 49 U.S.C. Chapter 53).
- (ii) For the purpose of developing the metropolitan transportation plan, the MPO, public transportation operator(s), and State shall cooperatively develop estimates of funds that will be available to support metropolitan transportation plan implementation, as required under \$450.314(a). All necessary financial resources from public and private sources that are reasonably expected to be made available to carry out the transportation plan shall be identified.
- (iii) The financial plan shall include recommendations on any additional financing strategies to fund projects and programs included in the metropolitan transportation plan. In the case of new funding sources, strategies for ensuring their availability shall be identified.
- (iv) In developing the financial plan, the MPO shall take into account all projects and strategies proposed for funding under title 23 U.S.C., title 49 U.S.C. Chapter 53 or with other Federal funds; State assistance; local sources; and private participation. Revenue and cost estimates that support the metropolitan transportation plan must use an inflation rate(s) to

- reflect "year of expenditure dollars," based on reasonable financial principles and information, developed cooperatively by the MPO, State(s), and public transportation operator(s).
- (v) For the outer years of the metropolitan transportation plan (i.e., beyond the first 10 years), the financial plan may reflect aggregate cost ranges/cost bands, as long as the future funding source(s) is reasonably expected to be available to support the projected cost ranges/cost bands.
- (vi) For nonattainment and maintenance areas, the financial plan shall address the specific financial strategies required to ensure the implementation of TCMs (Transportation Control Measures) in the applicable SIP.
- (vii) For illustrative purposes, the financial plan may include additional projects that would be included in the adopted transportation plan if additional resources beyond those identified in the financial plan were to become available.
- (viii) In cases that the FHWA and the FTA find a metropolitan transportation plan to be fiscally constrained and a revenue source is subsequently removed or substantially reduced (i.e., by legislative or administrative actions), the FHWA and the FTA will not withdraw the original determination of fiscal constraint; however, in such cases, the FHWA and the FTA will not act on an updated or amended metropolitan transportation plan that does not reflect the changed revenue situation.

ASSUMPTIONS AND DISTRIBUTIONS

A common set of assumptions and resource distribution factors have been developed by the four MPOs to promote consistency between agencies in the TIP and LRTP process. These assumptions and factors provide a common basis for the TIP and LRTP financial components and ensure that all agencies expectations are consistent. The full list of assumptions is below:

- Distribution of revenues to MPOs is based on 50% population and 50% Federal-Aid Eligible Lane Miles. Turnpike Revenues will be based on share of Turnpike Lane Miles in the region.
 - Population data is from the most recent Decennial Census or ODP population estimates
 - Federal-Aid Eligible and Turnpike lane mile data is from NHDOT Roads dataset
- Transit Funds are distributed based on current allocations to each transit agency. Due to transit systems overlapping regions, the distribution of funding will total to greater than 100% of available when all MPOs are added together
- Discretionary grants and Congressionally Designated Spending (CDS) "Earmarks" will be listed as a single line item in the tables with notes indicating project/source where appropriate.

 These projects do not include inflation factors and are not included revenue projections.

- The current approved inflation rate on project costs is 3.7% per year.
- The most recent STIP Fiscal Constraint document will be the source of the financial data for the TIP years (LRTP years 1-4).
- The most recent approved Ten Year Plan "Rainbow Chart" will be the source of data for LRTP years 6-10.
- LRTP years 11+ will be based on the most recent approved Ten Year Plan "Rainbow Chart" plus an inflation of 2% per year in revenues
- I-93 Debt service concludes in 2034. Revenues from SB367 will end at that time
- Operations and Maintenance is calculated using Federal Funds, Turnpike R&R funds, Betterment Funds, and Transit O&M
- Highway O&M values derived from NHDOT FY23 Annual Report page F5 Total Budgeted Roads and Bridges Operations and Maintenance https://www.nh.gov/transparentnh/annual-reports/transportation/documents/fy23.pdf
- Other State Funds includes SAB and TIFIA as well as any other State funding programs not explicitly listed elsewhere

Based on the assumptions above, the Revenue Distribution Table below was compiled. This table forms the basis for future funding availability to each of the MPO regions and is based on populations, Federal-Aid Eligible lane miles and Turnpike lane miles. The first two are compiled into a Composite Share of FHWA funds, while the third is utilized to distribute future Turnpike funds. FTA funding is distributed based on current regional transit system allocations.

Table 1: Revenue Distribution Table

| Region | Lane Miles of FAE Roadways | Percent of FAE Lane Miles | 2020 Census Population | Percent of Population | Composite Share of FHWA Funds | Turnpike Lane Miles | TPK Share |
|-------------|----------------------------------|---------------------------------|---------------------------|--------------------------|--|------------------------|--------------|
| NRPC | 759 | 8.84% | 217,543 | 15.79% | 12.31% | 94.8 | 19.59% |
| RPC | 1,066 | 12.41% | 198,870 | 14.44% | 13.42% | 151.7 | 31.35% |
| SNHPC | 1,252 | 14.57% | 285,230 | 20.71% | 17.64% | 77.5 | 16.02% |
| SRPC | 732 | 8.52% | 156,145 | 11.34% | 9.93% | 114 | 23.56% |
| Other Areas | 4,781 | 55.66% | 519,741 | 37.73% | 46.70% | 45.9 | 9.49% |
| NH Total | 8,590 | | 1,377,529 | | | 483.9 | |

The Revenue and Programming tables included in the fiscal constraint all have the same organization in terms of the funding programs listed. *Table 2* provides the full funding program for each of the acronyms as they are organized on financial tables.

Table 2: Funding Program Descriptions

| | | Table 2. Fulluling Program Descriptions |
|---------------|----------------------|--|
| | Program Acronym | Description |
| | CMAQ | Congestion Mitigation and Air Quality Program |
| | CRP | Carbon Reduction Program |
| | HSIP | Highway Safety Improvement Program |
| | NHFP | National Highway Freight Program |
| | NHPP | National Highway Performance Program |
| | PROTECT | Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation Program |
| _ | REC Trails | Recreational Trails Program |
| tio | Rail-Highway | Rail-Highway Crossing Improvement Program |
| Sec | SPR | State Planning and Research Program |
| FHWA Section | STBG | Surface Transportation Block Grant (Has multiple sub-programs) |
| 亡 | TAP | Transportation Alternatives Program |
| | Non-Formula Funds | Additional FHWA funds provided outside of the standard "Formula" based funds above. |
| | Redistribution | Funds received through the annual end-of-fiscal-year redistribution of unobligated funds. |
| | Discretionary Grants | Funds received through competitive grant programs such as RAISE, non-formula PROTECT, SS4A |
| | State Match | State funding specifically matching the federal programs above |
| | Local/Other Match | Local or Other funding matching the federal programs above |
| | FTA 5307 | Federal Transit Administration Urban Formula Funding |
| _ | FTA 5310 | Federal Transit Administration Enhanced Mobility of Seniors & Individuals with Disabilities |
| ctio | FTA 5311 | Federal Transit Administration Formula Grants for Rural Areas |
| FTA Section | FTA 5339 | Federal Transit Administration Buses and Bus Facilities Program |
| Ė | Discretionary Grants | Federal Transit Administration Discretionary Grant Programs |
| | State Match | State matching funds for FTA Programs |
| | Local/Other Match | Local/Other matching funds for FTA Programs |
| | Rail | Funding for Rail Programs |
| | Betterment | State Betterment program |
| State Section | SB367 | Four-cent road toll increase. Funds are utilized to pay down I-93 Salem to Manchester bond debt |
| Sec | Turnpike Capital | Turnpike Bureau funds for capital improvements |
| ate | Turnpike Renewal | Turnpike Bureau funds for maintenance projects |
| St | Other State Funds | Other State-based funding such as from legislation |
| | Other Matching | Other non-state funds used to match state funds |
| | | |

ANTICIPATED REVENUES

Revenues expected to be available for the Transportation Improvement Program were estimated utilizing data from the 2025-2028 State Transportation Improvement Program (STIP) and NHDOT's STIP Fiscal Constraint Documentation (Attached). Those documents provide program-level funding estimates for FHWA and FTA apportionments, detail State funding sources, and matching Local (and other) resources for projects in the region. Also included are estimates of Toll Credits to be utilized on transportation projects, Turnpike revenues, as well as proceeds from the four-cent increase in the state road toll (SB367) that is being utilized to pay the debt service on the I-93 Salem to Manchester project.

Tables 3 and 4 show projections of Federal, State, and Other funding expected to be available Statewide (Table 3) and to the MPO region (Table 4) between 2025 and 2050. Funding program level data is available for the first four years (2025-2028 STIP/TIP) however for 2029 and beyond funds are aggregated to the source level (FHWA, FTA, etc.) as the exact makeup and funding of individual programs is not known. Further, beyond the STIP/TIP Years, expected revenues are grouped into 5 or 6 year "bands" to simplify the process given the uncertainty of project programming, including Ten Year Plan projects which are not assigned to specific funding programs until they enter the TIP. The Fiscal Constraint documentation provided by NHDOT for the STIP is included at the end of this document.

^{*} When estimating revenues beyond the TIP, Total funds for each programming area are utilized instead of distributions to indivual funding programs for simplicity

MAINTENANCE AND OPERATIONS

Anticipated Maintenance and Operations needs for the Federal-Aid Eligible highways, NH Turnpikes, and Transit systems are detailed in *Table 5*. Information from NHDOT's FY23 Annual Report (Page F5 Total Budgeted Roads and Bridges Operations and Maintenance) forms the basis of the funding expected to be needed statewide for maintenance and operations of the State Highway System and Turnpikes information is obtained from the adopted 2025-2034 Ten Year Plan financial report ("Rainbow Chart") listing for Turnpike Renewal and Replacement Funds. The bottom of the table includes an estimated O&M cost per lane-mile for the Federal-Aid Eligible (FAE) System as well as the Turnpike System. These values were divided by the current lane-miles of state roadways to obtain a per mile cost for maintenance and operations. This value was then multiplied by the lane-miles of state roadway in each of the MPOs to obtain an estimate of funding available for maintenance and operations activities on State highways in the region.

Transit O&M information was derived from the average utilization of FTA 5307 (Urban) & FTA 5311 (Rural) funds for operations and maintenance activities during FY24 as identified in the Annual List of Obligated Projects and applying that factor to expected funding for all years. Funds indicated for each of the regions are the composite totals for each transit system that operates within the MPO and due to overlapping coverage areas, the regional totals will exceed the amount of funding available statewide. The Manchester Transit Authority (MTA) and Cooperative Alliance for Seacoast Transportation (COAST) both operate in multiple MPO regions and therefore are included in the totals for RPC (COAST & MTA), SNHPC (MTA), and SRPC (COAST).

¹ Highway O&M funds are comprised of NH Road Toll (59.7%), NH General Funds, as well as Federal funds

² Turnpike O&M funds are comprised of Turnpike Renewal & Replacement funds

³ Transit O&M calculated at 81% of FTA 5307 & 5311 funds plus match.

⁴ COAST Covers SRPC & RPC Regions. MTA/CART Covers SNHPC & RPC Regions creating Regional totals that exceed the Statewide Total

ANTICIPATED COSTS & FISCAL CONSTRAINT

Funds are assigned to each project in the State Transportation Improvement Program (STIP) and regional Transportation Improvement Program (TIP) from specific funding programs within the overall allocations of funding from FHWA and FTA. This information is aggregated into *Table 6*, which shows the distribution of funding as programmed for New Hampshire in the STIP, and *Table 7*, which shows the distribution of funding as programmed in the RPC region. Project costs for the Transportation Improvement Program are taken directly from the year of expenditure inflated values included in the 2025-2028 Transportation Improvement Program (TIP).

The State of New Hampshire does not sub-allocate funds to the MPOs for programming the TIPs, the assumption is that since the State Transportation Improvement Program (STIP) is fiscally constrained, and each MPO TIP is directly derived from that document, the TIP must therefore be fiscally constrained as well. In addition to the preceding tables, the Fiscal Constraint Documentation provided by NHDOT for the STIP is included.
