- Local

Soil Ratings for Development

This data set indicates the relative quality of a soil for development when compared to other soils in the same county survey. Suitability of a soil as it pertains to septic tank absorption fields, dwellings with basements, and local roads and streets were used as the basis for determining the potential of a soil for development. A composite rating was given to each soil type combining the rating for each of the three uses stated above. The ratings are given as one of the following: Very High, High, Medium, Low and Very Low. Some soil ratings were NA (Not Available) or were Not Rated, and were not used in this product. For further information regarding Soil Potential Ratings for Low Density Development, contact your County Conservation District.

This information was produced by the Rockingham County Conservation District and was distributed in the publication: Soil Potential Ratings for Low Density Development, Rockingham County, New Hampshire, published in May 1987.

RPC extends every effort to ensure map data is current and complete, however, errors do happen. Please let us know if you spot errors or omissions.

Base Features (transportation, political and hydrographic) were automated from the USGS Digital Line Graph data, 1:24,000, as archived in the GRANIT database at Complex Systems Research Center, Institute for the Study of Earth, Oceans and Space, University of New Hampshire, Durham, NH; 1992-2012. The roads within the Rockingham Planning Region have been updated by NH Department of Transportation through local input by the RPC where available.

Although these data have been processed successfully on a computer system at the Rockingham Planning Commission, no warranty expressed or implied is made regarding the accuracy or utility of the data on any other system or for general or scientific purposes, nor shall the act of distribution constitute any such warranty. It is also strongly recommended that careful attention be paid to the contents of the metadata file associated with these data to evaluate data set limitations, restrictions or intended use. Rockingham Planning Commission shall not be held liable for improper or incorrect use of the data described and/or contained herein.

This mapset was funded with grants from the NH Office of Energy and Planning and the RPC's UPWP grant.
